PLANNED DEVELOPMENT (PD) APPLICATION

Planned Development (PD) Review Criteria

Section 2401 of the Hamilton Zoning Ordinance states the purpose and standards for Planned Development (PD) projects. In reviewing a PD application, the Commission shall consider whether there is adequate evidence that the proposed development is consistent with the following Planned Development (PD) standards. These standards are intended to provide an alternative to standard zoning guidelines, to:

- A. Encourage development that is superior and imaginative design and function in developments.
- B. Establish an alternative procedure for the development of land in order to allow for more efficient and economic development of property than customarily permitted by conventional zoning and subdivision regulations.
- C. Encourage flexibility in the design of developments specifically in the preservation of open spaces, in the protection of natural features, in the utilization of existing site amenities, and in the creation of designs that are compatible with surrounding uses.
- D. Ensure orderly and thorough planning and review procedures that lead to higher quality design and development.
- E. Provide harmonious transitions between uses by utilizing varying uses, landscaping, buffers, design characteristics, or other similar techniques.
- F. Allow for the development of infill sites and the redevelopment of existing sites in creative manners that respect existing circumstances, adjacent land uses, topography, lot size, or other similar elements.
- G. Implement the vision set forth in the City's Comprehensive Plan and any amendments or supplements thereto. State how the proposal relates to existing land use of the vicinity, or to [Plan Hamilton](#), the City of Hamilton Comprehensive Plan. If the proposed use is inconsistent with the land uses in the surrounding area, justify any proposed deviation.

Waiver / Variance Review Criteria

Section 2409 I & J of the Hamilton Zoning Ordinance states that no variance or waiver to the General Design Standards or the Hamilton Zoning Ordinance shall be recommended for approval by the Planning Commission, or authorized by the City Council, unless the Commission and Council find whether there is adequate evidence that the proposed Conditional Use is consistent with the following General Standards.

In determining whether or not to waive or vary the General Design Standards found in any PD district, the Planning Commission shall consider and find that four (4) out of the five (5) following criteria apply to any specific PD:

- A. The proposed development is in conformance with the principles of the City Comprehensive Plan;
- B. The proposed development advances the general welfare of the city and immediate vicinity and will not impede the normal and orderly development and improvement of surrounding and abutting areas;
- C. Adequate utilities, access roads, drainage, retention/detention facilities are provided;
- D. The proposed development design, site arrangement, and/or anticipated benefits of the proposed development justify any deviation from the General Design Standards found herein;
- E. The proposed development design exceeds the quality of the building and site design in the immediate area.
